## **Beechdale Road Improvements –Resurfacing Works**

As works approach the final phase on Beechdale Road, we will be undertaking resurfacing works to complete this section of the scheme. Resurfacing works are required to remove the depleted existing carriageway and temporary surface installed following the removal of the central reservation. Resurfacing the carriageway will improve the road surface for all road users.

The resurfacing works are expected to take place between 18<sup>th</sup> March 2024 and 22<sup>nd</sup> March 2024. These works will be undertaken during the hours of 8pm to 5am and should take 5 days to complete. Works will begin outside the East Midlands Ambulance Station and move West towards Redbourne junction.

During this time vehicles will be required to parked off street, either on private drives or on neighbouring streets. Cones will be placed out in advance to prevent parking. Access to private drives within these times will not be possible due to the works, but residents will be notified in advance by the site team.

Bus service 28 which use these routes will be affected and diverted throughout these times. We are working with local bus operators to agree these routes in advance.

Works will generate substantial amounts of noise throughout the use of heavy plant and machinery. We will work hard to minimise disruption throughout these works, however should you have any questions, please contact me via email at [cycling@nottinghamcity.gov.uk](mailto:cycling@nottinghamcity.gov.uk)

More information on the project can be found at [www.transportnottingham.com/beechedale](http://www.transportnottingham.com/beechedale).

Kind regards

Kyle Howard
